

Name: _____
Age: _____
Date: _____

FRENCH HORN ACTIVITY SHEET

Parts of the French Horn

Fun Facts

- The French Horn is part of the Brass Family
- Even though it's called the 'French' Horn, it was actually created in Germany!
- It has the largest range of notes out of any brass instrument, going from bottom C all the way up to high C. That's four octaves!

David told Custard that if you stretched out all of the tubing of his French Horn, it would be 18 feet long!

That's as tall as a fully grown Giraffe...

...3ft taller than a Marae...

...and 3 x taller than a Double Bass!

Quiz!

Before it had keys, what activity was the horn originally used for? _____

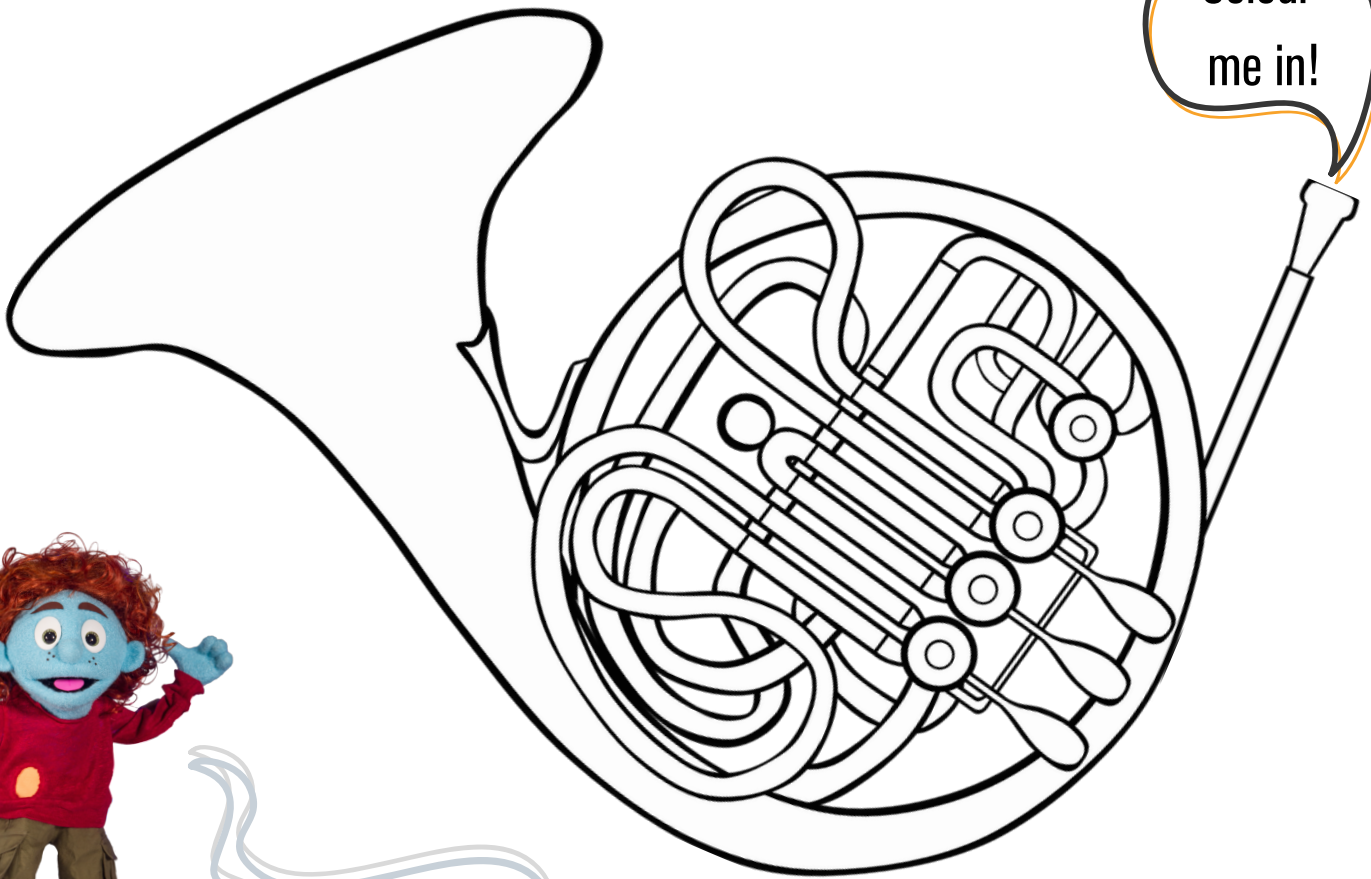

Which 3 movies did David play music from? _____

What other musical job does David have? _____
